Subject Index

Hearing

Nature of Hearing and its Disorders

Auditory Processing

Looking ahead: An introduction to five exploratory studies of Fast ForWord. Friel-Patti, S., Loeb, D. F., & Gillam, R. B. 10(3), 195–202.

Normal Auditory Systems

Backward and simultaneous masking measured in children with language-learning impairments who received intervention with Fast ForWord or Laureate Learning Systems software. Marler, J. A., Champlin, C. A., & Gillam, R. B. 10(3), 258–268.

Auditory and Other Otic Pathologies

Otitis media and language development: A meta-analysis. Casby, M. W. 10(1), 65–80.

Hearing Loss and Deafness

Otitis media and language development: A meta-analysis. Casby, M. W. 10(1), 65–80.

Assessment of Hearing

Psychoacoustics

Case studies of children using Fast ForWord. Friel-Patti, S., DesBarres, K., & Thibodeau, L. 10(3), 203–215.
Psychoacoustic performance in children completing Fast ForWord training. Thibodeau, L. M., Friel-Patti, S., & Britt, L. 10(3), 248–257.

Screening

The relationship between Minimum Data Set ratings and scores on measures of communication and hearing among nursing home residents with dementia. Hopper, T., Bayles, K. A., Harris, F. P., & Holland, A. 10(4), 370–381.

Diagnostic Audiology – General

Otitis media and language development: A meta-analysis. Casby, M. W. 10(1), 65–80.

Specific Diagnostic Techniques and Approaches – Behavioral

Backward and simultaneous masking measured in children with language-learning impairments who received intervention with Fast ForWord or Laureate Learning Systems software. Marler, J. A., Champlin, C. A., & Gillam, R. B. 10(3), 258–268.

Specific Diagnostic Techniques and Approaches – Masking

Backward and simultaneous masking measured in children with language-learning impairments who received intervention with Fast ForWord or Laureate Learning Systems software. Marler, J. A., Champlin, C. A., & Gillam, R. B. 10(3), 258–268.

Intervention

Habilitation, Rehabilitation and Education

Otitis media and language development: A

meta-analysis. Casby, M. W. 10(1), 65–80.
Psychoacoustic performance in children completing Fast ForWord training. Thibodeau, L. M., Friel-Patti, S., & Britt, L. 10(3), 248–257.

Language

Nature of Normal Language

Language Development

Enhancing vocabulary selection for preschoolers who require augmentative and alternative communication (AAC). Fallon, K. A., Light, J. C., & Paige, T. K. 10(1), 81–94.
Idiom understanding in preadolescents: Synergy in action. Nippold, M. A., Moran, C., & Schwarz, I. E. 10(2), 169–179.
Normal acquisition of consonant clusters. McLeod, S., van Doorn, J., & Reed, V. A. 10(2), 99–110.
Otitis media and language development: A meta-analysis. Casby, M. W. 10(1), 65–80.

Language Differences and Different Languages

Reducing test bias through dynamic assessment of children's word learning ability. Peña, E., Iglesias, A., & Lidz, C. S. 10(2), 138–154.
Validity of the Spanish Preschool Language Scale-3 for use with bilingual children. Restrepo, M. A., & Silverman, S. W. 10(4), 382–393.

Verbal Learning and Memory

Backward and simultaneous masking measured in children with language-learning impairments who received intervention with Fast ForWord or Laureate Learning Systems software. Marler, J. A., Champlin, C. A., & Gillam, R. B. 10(3), 258–268.
Language change following computer-assisted language instruction with Fast ForWord or Laureate Learning Systems software. Gillam, R. B., Crofford, J. A., Gale, M. A., & Hoffman, L. M. 10(3), 231–247.
Otitis media and language development: A meta-analysis. Casby, M. W. 10(1), 65–80.

Language Disorders

Aphasia and Other Adult Language Disorders

Aphasia management during the early phases of recovery following stroke. Holland, A., & Fridriksson, J. 10(1), 19–28.
Communication in context: A qualititative study of the experiences of individuals with multiple sclerosis. Yorkston, K. M., Klasner, E. R., & Swanson, K. M. 10(2), 126–137.
Final thoughts on management of aphasia in the early phases of recovery following stroke. Holland, A., & Fridriksson, J. 10(1), 37–39.
Further thoughts regarding management of acute aphasia following stroke. Peach, R. K. 10(1), 29–36.
Interpretation of fables and proverbs by African Americans with and without aphasia. Ulatowska, H. K., Wertz, R. T., Chapman, S. B., Hill, C. L., Thompson, J. L., Keebler, M. W., Olness, G. S., Parsons, S. D., Miller, T., & Auther, L. L. 10(1), 40–50.

Language Disorders in Children

Backward and simultaneous masking measured in children with language-learning impairments who received intervention with Fast ForWord or Laureate Learning Systems software. Marler, J. A., Champlin, C. A., & Gillam, R. B. 10(3), 258–268.
Case studies of children using Fast ForWord. Friel-Patti, S., DesBarres, K., & Thibodeau, L. 10(3), 203–215.
Children with a history of expressive vocabulary delay: Outcomes at 5 years of age. Girolametto, L., Wiigs, M., Smyth, R., Weitzman, E., & Pearce, P. S. 10(4), 358–369.
Idiom understanding in preadolescents: Synergy in action. Nippold, M. A., Moran, C., & Schwarz, I. E. 10(2), 169–179.
Language change following computer-assisted language instruction with Fast ForWord or Laureate Learning Systems software. Gillam, R. B., Crofford, J. A., Gale, M. A., & Hoffman, L. M. 10(3), 231–247.
Language changes associated with Fast ForWord: Evidence from case studies. Loeb, D. F., Stoke, C., & Fey, M. E. 10(3), 216–230.
Looking ahead: An introduction to five exploratory studies of Fast ForWord. Friel-Patti, S., Loeb, D. F., & Gillam, R. B. 10(3), 195–202.
Looking back: A summary of five exploratory studies of Fast ForWord. Gillam, R. B., Loeb, D. F., & Friel-Patti, S. 10(3), 269–273.
Narration abilities of children with language-learning disabilities in response to oral and written stimuli. Wright, H. H., & Newhoff, M. 10(3), 308–319.
Otitis media and language development: A meta-analysis. Casby, M. W. 10(1), 65–80.
Parental recasts and production of copulas and articles by children with specific language impairment and typical language. Proctor-Williams, K., Fey, M. E., & Loeb, D. F. 10(2), 155–168.
Phonologically disordered German-speaking children. Fox, A. V., & Dodd, B. 10(3), 291–307.
Psychoacoustic performance in children completing Fast ForWord training. Thibodeau, L. M., Friel-Patti, S., & Britt, L. 10(3), 248–257.
Reducing test bias through dynamic assessment of children's word learning ability. Peña, E., Iglesias, A., & Lidz, C. S. 10(2), 138–154.
The use of MLU for identifying language impairment in preschool children: A review. Eisenberg, S. L., Fersko, T. M., & Lundgren, C. 10(4), 323–342.
Validity of the Spanish Preschool Language Scale-3 for use with bilingual children. Restrepo, M. A., & Silverman, S. W. 10(4), 382–393.

Learning Disabilities

Looking back: A summary of five exploratory studies of Fast ForWord. Gillam, R. B., Loeb, D. F., & Friel-Patti, S. 10(3), 269–273.
Otitis media and language development: A meta-analysis. Casby, M. W. 10(1), 65–80.

Assessment and Intervention

Assessment

Accuracy of four language analysis procedures performed automatically. Long, S. H., & Channell, R. W. 10(2), 180–188.
Backward and simultaneous masking measured in children with language-learning impairments who received intervention with Fast ForWord or Laureate Learning Systems software. Marler, J. A., Champlin, C. A., & Gillam, R. B. 10(3), 258–268.
Case studies of children using Fast ForWord. Friel-Patti, S., DesBarres, K., & Thibodeau, L. 10(3), 203–215.
Children with a history of expressive vocabulary delay: Outcomes at 5 years of age. Girolametto, L., Wiigs, M., Smyth, R., Weitzman, E., & Pearce, P. S. 10(4), 358–369.
Communication in context: A qualititative study of the experiences of individuals with multiple sclerosis. Yorkston, K. M., Klasner, E. R., & Swanson, K. M. 10(2), 126–137.
Further thoughts regarding management of acute aphasia following stroke. Peach, R. K. 10(1), 29–36.
Language change following computer-assisted language instruction with Fast ForWord or Laureate Learning

Systems software. Gillam, R. B., Crofford, J. A., Gale, M. A., & Hoffman, L. M. 10(3), 231–247.
Normal acquisition of consonant clusters. McLeod, S., van Doorn, J., & Reed, V. A. 10(2), 99–110.
Phonologically disordered German-speaking children. Fox, A. V., & Dodd, B. 10(3), 291–307.
Reducing test bias through dynamic assessment of children's word learning ability. Peña, E., Iglesias, A., & Lidz, C. S. 10(2), 138–154.
The relationship between Minimum Data Set ratings and scores on measures of communication and hearing among nursing home residents with dementia. Hopper, T., Bayles, K. A., Harris, F. P., & Holland, A. 10(4), 370–381.
The use of MLU for identifying language impairment in preschool children: A review. Eisenberg, S. L., Fersko, T. M., & Lundgren, C. 10(4), 323–342.
Validity of the Spanish Preschool Language Scale-3 for use with bilingual children. Restrepo, M. A., & Silverman, S. W. 10(4), 382–393.

Intervention
Backward and simultaneous masking measured in children with language-learning impairments who received intervention with Fast ForWord or Laureate Learning Systems software. Marler, J. A., Champlin, C. A., & Gillam, R. B. 10(3), 258–268.
Case studies of children using Fast ForWord. Friel-Patti, S., DesBarres, K., & Thibodeau, L. 10(3), 203–215.
Enhancing vocabulary selection for preschoolers who require augmentative and alternative communication (AAC). Fallon, K. A., Light, J. C., & Paige, T. K. 10(1), 81–94.
Further thoughts regarding management of acute aphasia following stroke. Peach, R. K. 10(1), 29–36.
Idiom understanding in preadolescents: Synergy in action. Nippold, M. A., Moran, C., & Schwarz, I. E. 10(2), 169–179.
Language change following computer-assisted language instruction with Fast ForWord or Laureate Learning Systems software. Gillam, R. B., Crofford, J. A., Gale, M. A., & Hoffman, L. M. 10(3), 231–247.
Language changes associated with Fast ForWord: Evidence from case studies. Loeb, D. F., Stoke, C., & Fey, M. E. 10(3), 216–230.
Looking back: A summary of five exploratory studies of Fast ForWord. Gillam, R. B., Loeb, D. F., & Friel-Patti, S. 10(3), 269–273.

Nonspeech Communication Systems
Enhancing vocabulary selection for preschoolers who require augmentative and alternative communication (AAC). Fallon, K. A., Light, J. C., & Paige, T. K. 10(1), 81–94.

Speech

Nature of Normal Speech

Development of Speech and Voice
The effect of dialect on phonological analysis: Evidence from Spanish-speaking children. Goldstein, B. A., & Iglesias, A. 10(4), 394–406.

Speech and Voice Disorders

Articulation and Resonance Disorders
The effect of dialect on phonological analysis: Evidence from Spanish-speaking children. Goldstein, B. A., & Iglesias, A. 10(4), 394–406.

Physiologically Based Speech Disorders
Communication in context: A qualititative study of the experiences of individuals with multiple sclerosis. Yorkston, K. M., Klasner, E. R., & Swanson, K. M. 10(2), 126–137.
A description of phonetic, acoustic, and physiological changes associated with improved intelligibility in a speaker with spastic dysarthria. Roy, N., Leeper, H. A., Blomgren, M., & Cameron, R. M. 10(3), 274–290.
Intensive voice treatment and respiration treatment for hypokinetic-spastic dysarthria after traumatic brain injury. Solomon, N. P., McKee, A. S., & Garcia-Barry, S. 10(1), 51–64.

Voice and Other Laryngeal Disorders
Half-swallow boom: Does it really happen? Pannbacker, M. 10(1), 17–18.
Paradoxical vocal fold motion: A tutorial on a complex disorder and the speech-language pathologist's role. Mathers-Schmidt, B. A. 10(2), 111–125.

Dysphagia
Teachers' conceptions of their role in improving students' preparation for clinical work in dysphagia. Scholten, I. 10(4), 343–357.

Assessment and Intervention

Assessment
A description of phonetic, acoustic, and physiological changes associated with improved intelligibility in a speaker with spastic dysarthria. Roy, N., Leeper, H. A., Blomgren, M., & Cameron, R. M. 10(3), 274–290.
The effect of dialect on phonological analysis: Evidence from Spanish-speaking children. Goldstein, B. A., & Iglesias, A. 10(4), 394–406.
Paradoxical vocal fold motion: A tutorial on a complex disorder and the speech-language pathologist's role. Mathers-Schmidt, B. A. 10(2), 111–125.

Acoustic Measures of Speech and Voice
A description of phonetic, acoustic, and physiological changes associated with improved intelligibility in a speaker with spastic dysarthria. Roy, N., Leeper, H. A., Blomgren, M., & Cameron, R. M. 10(3), 274–290.

Intervention
A description of phonetic, acoustic, and physiological changes associated with improved intelligibility in a speaker with spastic dysarthria. Roy, N., Leeper, H. A., Blomgren, M., & Cameron, R. M. 10(3), 274–290.
Intensive voice treatment and respiration treatment for hypokinetic-spastic dysarthria after traumatic brain injury. Solomon, N. P., McKee, A. S., & Garcia-Barry, S. 10(1), 51–64.
Paradoxical vocal fold motion: A tutorial on a complex disorder and the speech-language pathologist's role. Mathers-Schmidt, B. A. 10(2), 111–125.

Instrumentation for Diagnosis, Treatment, and Research
Accuracy of four language analysis procedures performed automatically. Long, S. H., & Channell, R. W. 10(2), 180–188.
A description of phonetic, acoustic, and physiological changes associated with improved intelligibility in a speaker with spastic dysarthria. Roy, N., Leeper, H. A., Blomgren, M., & Cameron, R. M. 10(3), 274–290.

Professional and General Scientific Issues

Professional Affairs

Service Provision Models and Problems
Aphasia management during the early phases of recovery following stroke. Holland, A., & Fridriksson, J. 10(1), 19–28.
Final thoughts on management of aphasia in the early phases of recovery following stroke. Holland, A., & Fridriksson, J. 10(1), 37–39.
Looking back: A summary of five exploratory studies of Fast ForWord. Gillam, R. B., Loeb, D. F., & Friel-Patti, S. 10(3), 269–273.
The relationship between Minimum Data

Set ratings and scores on measures of communication and hearing among nursing home residents with dementia. Hopper, T., Bayles, K. A., Harris, F. P., & Holland, A. 10(4), 370–381.

Research Issues and Methodology

Accuracy of four language analysis procedures performed automatically. Long, S. H., & Channell, R. W. 10(2), 180–188.

"A lot of work keeping everything controlled": A class research project. Blischak, D. M., & Cheek, M. 10(1), 10–16.

Otitis media and language development: A meta-analysis. Casby, M. W. 10(1), 65–80.

Interdisciplinary Concerns

Otitis media and language development: A meta-analysis. Casby, M. W. 10(1), 65–80.

Professional Training

Education and Continuing Education

"A lot of work keeping everything controlled": A class research project. Blischak, D. M., & Cheek, M. 10(1), 10–16.

Teachers' conceptions of their role in improving students' preparation for clinical work in dysphagia. Scholten, I. 10(4), 343–357.

Clinical Supervision and Interaction

Teachers' conceptions of their role in improving students' preparation for clinical work in dysphagia. Scholten, I. 10(4), 343–357.

Historical Perspectives

Global Perspective

The education and practice of speech-language pathologists in Malaysia. Lian, C. H. T., & Abdullah, S. 10(1), 3–9.

Title Index

Accuracy of four language analysis procedures performed automatically. Long, S. H., & Channell, R. W. 10(2), 180–188.

Aphasia management during the early phases of recovery following stroke. Holland, A., & Fridriksson, J. 10(1), 19–28.

Backward and simultaneous masking measured in children with language-learning impairments who received intervention with Fast ForWord or Laureate Learning Systems software. Marler, J. A., Champlin, C. A., & Gillam, R. B. 10(3), 258–268.

Case studies of children using Fast ForWord. Friel-Patti, S., DesBarres, K., & Thibodeau, L. 10(3), 203–215.

Children with a history of expressive vocabulary delay: Outcomes at 5 years of age. Girolametto, L., Wiigs, M., Smyth, R., Weitzman, E., & Pearce, P. S. 10(4), 358–369.

Communication in context: A qualititative study of the experiences of individuals with multiple sclerosis. Yorkston, K. M., Klasner, E. R., & Swanson, K. M. 10(2), 126–137.

A description of phonetic, acoustic, and physiological changes associated with improved intelligibility in a speaker with spastic dysarthria. Roy, N., Leeper, H. A., Blomgren, M., & Cameron, R. M. 10(3), 274–290.

The education and practice of speech-language pathologists in Malaysia. Lian, C. H. T., & Abdullah, S. 10(1), 3–9.

The effect of dialect on phonological analysis: Evidence from Spanish-speaking children. Goldstein, B. A., & Iglesias, A. 10(4), 394–406.

Enhancing vocabulary selection for preschoolers who require augmentative and alternative communication (AAC). Fallon, K. A., Light, J. C., & Paige, T. K. 10(1), 81–94.

Final thoughts on management of aphasia in the early phases of recovery following stroke. Holland, A., & Fridriksson, J. 10(1), 37–39.

Further thoughts regarding management of acute aphasia following stroke. Peach, R. K. 10(1), 29–36.

Half-swallow boom: Does it really happen? Pannbacker, M. 10(1), 17–18.

Idiom understanding in preadolescents: Synergy in action. Nippold, M. A., Moran, C., & Schwarz, I. E. 10(2), 169–179.

Intensive voice treatment and respiration treatment for hypokinetic-spastic dysarthria after traumatic brain injury. Solomon, N. P., McKee, A. S., & Garcia-Barry, S. 10(1), 51–64.

Interpretation of fables and proverbs by African Americans with and without aphasia. Ulatowska, H. K., Wertz, R. T., Chapman, S. B., Hill, C. L., Thompson, J. L., Keebler, M. W., Olness, G. S., Parsons, S. D., Miller, T., & Auther, L. L. 10(1), 40–50.

Language change following computer-assisted language instruction with Fast ForWord or Laureate Learning Systems software. Gillam, R. B., Crofford, J. A., Gale, M. A., & Hoffman, L. M. 10(3), 231–247.

Language changes associated with Fast ForWord: Evidence from case studies. Loeb, D. F., Stoke, C., & Fey, M. E. 10(3), 216–230.

Looking ahead: An introduction to five exploratory studies of Fast ForWord. Friel-Patti, S., Loeb, D. F., & Gillam, R. B. 10(3), 195–202.

Looking back: A summary of five exploratory studies of Fast ForWord. Gillam, R. B., Loeb, D. F., & Friel-Patti, S. 10(3), 269–273.

"A lot of work keeping everything controlled": A class research project. Blischak, D. M., & Cheek, M. 10(1), 10–16.

Narration abilities of children with language-learning disabilities in response to oral and written stimuli. Wright, H. H., & Newhoff, M. 10(3), 308–319.

Normal acquisition of consonant clusters. McLeod, S., van Doorn, J., & Reed, V. A. 10(2), 99–110.

Otitis media and language development: A meta-analysis. Casby, M. W. 10(1), 65–80.

Paradoxical vocal fold motion: A tutorial on a complex disorder and the speech-language pathologist's role. Mathers-Schmidt, B. A. 10(2), 111–125.

Parental recasts and production of copulas and articles by children with specific language impairment and typical language. Proctor-Williams, K., Fey, M. E., & Loeb, D. F. 10(2), 155–168.

Phonologically disordered German-speaking children. Fox, A. V., & Dodd, B. 10(3), 291–307.

Psychoacoustic performance in children completing Fast ForWord training. Thibodeau, L. M., Friel-Patti, S., & Britt, L. 10(3), 248–257.

Reducing test bias through dynamic assessment of children's word learning ability. Peña, E., Iglesias, A., & Lidz, C. S. 10(2), 138–154.

The relationship between Minimum Data Set ratings and scores on measures of communication and hearing among nursing home residents with dementia. Hopper, T., Bayles, K. A., Harris, F. P., & Holland, A. 10(4), 370–381.

Teachers' conceptions of their role in improving students' preparation for clinical work in dysphagia. Scholten, I. 10(4), 343–357.

The use of MLU for identifying language impairment in preschool children: A review. Eisenberg, S. L., Fersko, T. M., & Lundgren, C. 10(4), 323–342.

Validity of the Spanish Preschool Language Scale-3 for use with bilingual children. Restrepo, M. A., & Silverman, S. W. 10(4), 382–393.

Department Index

Clinical Consult

The use of MLU for identifying language impairment in preschool children: A review. Eisenberg, S. L., Fersko, T. M., & Lundgren, C. 10(4), 323–342.

Clinical Focus

A description of phonetic, acoustic, and physiological changes associated with improved intelligibility in a speaker with spastic dysarthria. Roy, N., Leeper, H. A., Blomgren, M., & Cameron, R. M. 10(3), 274–290.

Research

Accuracy of four language analysis procedures performed automatically. Long, S. H., & Channell, R. W. 10(2), 180–188.

Children with a history of expressive vocabulary delay: Outcomes at 5 years of age. Girolametto, L., Wiigs, M., Smyth, R., Weitzman, E., & Pearce, P. S. 10(4), 358–369.

Communication in context: A qualititative study of the experiences of individuals with multiple sclerosis. Yorkston, K. M., Klasner, E. R., & Swanson, K. M. 10(2), 126–137.

The effect of dialect on phonological analysis: Evidence from Spanish-speaking children. Goldstein, B. A., & Iglesias, A. 10(4), 394–406.

Enhancing vocabulary selection for preschoolers who require augmentative and alternative communication (AAC). Fallon, K. A., Light, J. C., & Paige, T. K. 10(1), 81–94.

Idiom understanding in preadolescents: Synergy in action. Nippold, M. A., Moran, C., & Schwarz, I. E. 10(2), 169–179.

Intensive voice treatment and respiration treatment for hypokinetic-spastic dysarthria after traumatic brain injury. Solomon, N. P., McKee, A. S., & Garcia-Barry, S. 10(1), 51–64.
